

Primary Care Primary Care Prevention Discussion

Instructions (30 minutes):

1. **20 minutes:**

- a. **DISCUSSION QUESTIONS:** Using the materials attached pick one or two of the measures and go through these questions:
- i. What have you found to be the most effective strategies to achieve these performance measures?
 - ii. What challenges have you encountered in working to achieve these performance measures?
 - iii. Are there any opportunities to collaborate with other providers serving the same patients to achieve common performance measures?

2. **10 minutes:** Volunteers from groups will report key thoughts or questions to larger group.

• **Materials:**

- Discussion Questions
- List of Measures in the Bundle and Which DSRIP providers have those measures
- List of activities providers are implementing to achieve their measures (not all inclusive)

• **Note Taker:** Record thoughts and comments on post it paper:

- Identify the measure(s) discussed
- Key notes
- Questions
- Unique Ideas

• **Introductions (very quick):** Name, Organization, Your Role, Overall approach to achieving measure selected (in two sentences or less)

C1: Primary Care Prevention - Healthy Texans

Measure ID	Measure Name	Providers
C1-105	Preventive Care & Screening: Tobacco Use: Screening & Cessation Intervention	UT Southwestern Medical Center at Dallas Dallas County Hospital District dba Parkland Health UNTHSC at Fort Worth

D1-T01	Innovative Measure: Behavioral Health Counselling for Childhood Obesity	Children's Medical Center of Dallas

RHP 9, 10, & 18 Activities Providers are Implementing to Achieve Primary Care Measures

Common Themes	Activity	Provider
Implementation of evidence-based strategies to empower patients to make lifestyle changes to stay healthy and self-manage their chronic conditions	<p>Disease management emphasizes prevention of disease-related exacerbations and complications using evidence-based guidelines and patient empowerment tools. It can help manage and improve the health status of a defined patient population over the entire course of a disease.</p> <p>Tarrant County Public Health will facilitate self-management classes for patients with or at risk for chronic conditions such as asthma, COPD, and diabetes.</p> <p>The Total Diabetes Care program is a continuation project from DY6. This program has grown significantly mainly due to our two Certified Diabetes Educator (CDE) nurses that are instrumental in the training and education for the diabetes patient population.</p>	<p>Parkland</p> <p>Tarrant County Public Health</p> <p>Wise Health System</p>
Provision of coordinated services for patients under Patient Centered Medical Home (PCMH) model, which incorporates empanelment of patients to physicians, and management of chronic conditions and preventive care	<p>White Rock has partnered with Mission East Dallas, a local FQHC that is a certified PCMH to improve access to primary care services available to LIU in the East Dallas, Mesquite and Garland communities.</p> <p>124 Providers will be committed to the interventions and 33 primary care locations will be impacted and covered under Core Activity- Patient Centered Medical Home.</p>	<p>Tenet Hospital - Doctors Hospital at White Rock</p> <p>Cook-Fort Worth Children's Medical Center</p>
Provision of screening and follow up services	UT Southwestern Medical Center's (UTSW) goal is to increase the documentation and utilization of preventative screenings in the primary	UTSW at Dallas

Common Themes	Activity	Provider
	<p>care setting with the aim to provide patient education, increase access to follow up services and clinical interventions as needed.</p> <p>Establish standard screening protocols for use across the health network in order to improve early detection of common health concerns.</p>	Tarrant County Hospital District - JPS
Provision of vaccinations to target population	<p>Access to primary care for wellness and preventative care. 124 providers will be committed to the interventions and 34 primary care locations will be impacted</p> <p>The UNTHSC Clinical Practice Group aims to utilize multidisciplinary teams to improve access to primary care services as well as provide necessary and appropriate vaccinations to the target population.</p>	<p>Cook-Fort Worth Children’s Medical Center</p> <p>UNTHSC Fort Worth</p>
Utilization of care teams that are tailored to the patient’s health care needs, including non-physician health professionals, such as pharmacists doing medication management; case managers providing care outside of the clinic setting via phone, email, and home visits; etc.	<p>Using social workers, chronic care staff and other staff to also help educate patients on the importance of cancer screening will help to also increase adherence. We plan to socialize the cancer screening measures with the physicians on a regular data dashboard will also help to create reminders and encourage physicians to help remind patients to get their appropriate screenings.</p> <p>In DY2-6 we focused on creating the services and infrastructure for a PCMH, now, through its establishment and success, we will focus on prevention as well as the high need populations of Diabetes through providing integrated, coordinated and structured PCMH care model.</p> <p>UNTHSC aims to utilize multidisciplinary teams to improve patient care across the system. Clinical pharmacists will perform medication therapy management services for UNTHSC patients. Additionally, UNTHSC is implementing a health coaching program. The health coaching team will help patients address social determinants of health. Primary care training programs will enhance chronic care management and better integrate health coaching and clinical pharmacist services with primary care.</p>	<p>Tenet Frisco Ltd dba Centennial Medical Center</p> <p>Baylor Medical Center Irving Baylor All Saints Medical Center</p> <p>UNTHSC Fort Worth</p>
