THA will be implementing the best practice, evidence based HEP program created by Texas Health Harris Methodist Hospital Alliance to address	Prior demonstration per DSRIP projects have focused on shortening the number of low acuity visits at the medicaid, low income, underinsured (MAUI) to the most appropriate setting of care. The MAUI project seems in placing the MAUI patients with a primary care provider to provide continuity of care and reduce the ED visits and hospitalizations for ambulatory care sensitive conditions. Our nurse navigator program was very effective and have demonstrated a decrease in MAUI visits to the emergency department. EPA has been a difficult plan for us to maintain the success in prior years in that the EPA has been unwilling to enroll the MAUI patients into long term primary care programs. We have also had primary care providers who have dropped out of the EPA due to the low reimbursement of these providers who will not care our these patients. We have carried this project forward and have had success in placing our patients in PCMH.				HHSC does not request additional information on this measure.
