

Anchor Update 1.25.19

Good Afternoon Region 10 Providers,

Below are a few updates from HHSC for this week:

DY8 R1 Interim Corrections Period

- The DY8 R1 Interim Corrections Template has been posted to the DSRIP Online Reporting System bulletin board. The Interim Corrections period ends on 2/22/19 and all templates should be submitted to the Waiver mailbox. Please note the Interim Correction template now requires certification, similar to a Cat C reporting template.
- Measures with a baseline review status of "accepted" are eligible to submit a correction.
- Providers with TA Flags who need to correct their previously reported baseline will require an override code that will be provided through the TA resolution process. Providers submitting a correction for a baseline that was not flagged for TA do not need an override code to submit a correction.
- Innovative measures are not eligible to submit an interim correction at this time, but will be eligible to submit a correction if needed during the April reporting period.
- HHSC will begin reviewing submitted corrections in late February, and currently plans to notify providers of their baseline correction review acceptance or additional TA needed by March 22nd.

Online Reporting System

- Providers have been experiencing an error when trying to submit a "Forgot Password/Login?" request. If a provider needs to reset their password and encounters this issue, please contact the Waiver mailbox at TXHealthcareTransformation@hhsc.state.tx.us for a temporary password until HHSC IT is able to resolve it.
