

Anchor Update 10/26/17

Good Afternoon Region 10 Providers,

I have one brief update for you from HHSC this week. Please see the below information.

Attached is a DY7-8 payment flow tool HHSC developed to view how potential DY7-8 reporting and payments may work for providers. The first tab gives an overview of reporting and funding requirements, and the second tab gives an example where providers can change the data in the yellow cells to see how it might apply to them. The tool assumes that providers are reporting in the earliest eligible reporting periods based on an April 30, 2018, RHP Plan Update submission date.

Happy October Reporting,
