

Anchor Update 2.1.19

Category C Baseline TA

- HHSC has sent all technical assistance (TA) initiation e-mails to providers with baseline TA flags. Providers are encouraged to resolve their baseline TA flags quickly in order to correct baselines in the interim corrections period, ending 2/22/19. HHSC will follow-up with providers that did not reply by the requested response deadline.

DSRIP Transition Proposals Posted

- The Special Terms and Conditions (STCs) of the Texas 1115 Healthcare Transformation and Quality Improvement Program Waiver include a requirement to submit a draft DSRIP Transition Plan to CMS by October 1, 2019 and finalized by March 31, 2020. This Transition Plan must describe how the state will further develop its delivery system reform efforts without DSRIP funding after DY10, which ends on September 30, 2021. The Transition Plan will include milestones for HHSC for DY9-10 as the state prepares for DSRIP to end.
- Interested stakeholders were invited to submit transition proposals due to HHSC by November 30, 2018 to provide HHSC with direction and input as they create a draft DSRIP Transition Plan. Thirty-seven proposals and eight letters were received, many from anchors and RHPs. Thank you for your input. The submitted proposals were collected, organized, and summarized into an Excel document available for public viewing that was recently posted to the Waiver Renewal page on the HHSC website. The proposals can be found [here](#).

Online Reporting System

- Providers have been experiencing an error when trying to submit a “Forgot Password/Login?” request. If a provider needs to reset their password and encounters this issue, please contact the waiver mailbox at TXHealthcareTransformation@hhsc.state.tx.us for a temporary password until HHSC IT is able to resolve it.
