

Anchor Update 3/17/17

Good Afternoon Region 10 Providers,

I have a few updates for you this afternoon.

April DY6 Reporting

- The regional file for HHSC's semi-annual user/contact update is due back to the RHP 10 mailbox (RHP_Region_10@jpshealth.org) by **Wednesday, March 22nd**. After this deadline, providers will need to submit RHP Contact Change Forms to the waiver mailbox if they need to update their facility's user access or contact information.
- Category 4 PPE reports will be sent to hospital providers at the end of March.
- HHSC will be holding a webinar for April DY6 Reporting on **Wednesday, April 5th, from 10:30 a.m. to 12:00 p.m.** The April DY6 Reporting webinar will focus on QPI and Category 3. Log-in information will be sent out and posted on the waiver website as soon as it is available.

Category 3

- HHSC has updated the Category 3 summary documents following DY5R2 NMI Reporting, MSLC Updates, and approved DY6 R1 Interim Corrections submitted by the February deadline. Please review the attached documents carefully and contact HHSC if you identify any errors in reporting history, goal calculation, approved subsets or measurement periods. Please contact HHSC by **March 29th** with any identified errors so that they can be corrected before finalizing the April DY6 reporting template.
 - The RHP Summary File has been updated so that outcomes that moved regions because of project combinations are included under both the associated DY5 and DY6 region.
 - The Category 3 Summary Workbook and Goal Calculator continues to use DY5 regions and project IDs to generate reporting history summaries.
- The updated files are attached and should be posted to the waiver website early next week.
