

Anchor Update 5/11/18

Good Morning Region 10 Providers,
Just a few updates for you this week:

April DY7 Reporting

- HHSC reached out to providers on Monday to collect missing Provider and Project Summary reports that are required SAR reporting for those providers with active DY6 carryforward metrics. In many cases the provider overlooked the Project Summary tab because they were only reporting on the associated Category 3 projects. Please note that providers were still expected to submit a report for all required SAR fields (i.e., Provider Summary, Project Summary, and Progress Update) if they have active DY6 carryforward metrics, even if it was only Category 3 carryforward. Providers should respond to HHSC by **COB Monday, May 14**.
 - For Project Summary, the provider may discuss continuing related Category 1 or 2 project activities and/or their ongoing Category 3 activities. If a Project Summary question does not apply to the carryforward Category 3 project (e.g., progress on core components), then the provider may enter "NA" and a brief explanation of why it's not applicable.
 - The Project Summary Forms will refer to the Category 1 or 2 project, so the provider may need to refer to its associated Category 3 project(s) if they only have Category 3 DY6 carryforward metrics.

Compliance Monitoring

- MSLC did a presentation at the RHP 8 & 17 Learning Collaborative on May 7th on compliance monitoring, data collection, and the guidance that MSLC developed for Categories B, C and risk adjustment. This presentation was recorded and will be available on the RHP 8 and 17 websites. Providers from other regions will be able to view the presentation and submit additional questions for MSLC via the anchors. HHSC will provide additional information about the deadline for submitting questions related to the MSLC presentation. MSLC will develop an FAQ list that will be shared with providers.

Category C

- Attached are the final milestone requirements for participation in the Quality Improvement Collaborative Activity for Measure E2-A01. We will also post these on the online reporting system bulletin board.

- DSHS will be reaching out to those providers who selected the E2 bundle in their RHP Plan Updates to make sure they are signed up for TexasAIM Plus.
