

Anchor Update 9/14/18

Good Morning Region 10 Providers,

Please see the below updates from HHSC.

October DY7 Reporting

- Save the date for October DY7 reporting webinars to be held on **Thursday, October 4th**. General reporting information and Categories A, B & D will be covered in the morning from 10:00 - 11:30, and the Category C webinar will be in the afternoon from 1:30 - 3:30. HHSC will send out webinar log-in information to all providers as soon as it is available.
- In preparation for the October DY7 reporting period, if a provider needs to request access to the reporting system for additional staff, they should complete the RHP Contact Change Form, making sure to check the option for DSRIP Website (User) under "Location of Change," and submit it to the waiver mailbox at TXHealthcareTransformation@hhsc.state.tx.us. HHSC Staff will make updates as we receive them.

Compliance Monitoring

- Category 3 recoupment notices were sent out last Friday. HHSC also notified providers who have Category 3 reported PYs that need to be corrected or carryforward reporting that is required during October DY7.
- HHSC is sending out final notifications for Round 3 for Categories 1 & 2, and Round 4 is in process.

Category D Reporting

- HHSC will post Cat D reporting questions on the bulletin board this week.
- HHSC has additional clarification for hospital reporting on Patient Satisfaction. As stated in previous communication, the measurement period for reporting on Patient Satisfaction will be standardized starting with the October DY7 reporting period, during which providers will use measurement period 10/1/2016 - 9/30/2017 (DY6). In DY8, providers will report on 10/1/17 - 9/30/18 either in April or October depending on when they receive "Top-Box" response data for the reporting questions. Providers must use consistent methodology for reporting in DY7 and DY8.
