Implementing the Theory of Action

The Theory of Action is based on StriveTogether's Framework for Building Cradle to Career Civic Infrastructure. The Theory of Action consists of five **Gateways**: Exploring, Emerging, Sustaining, Systems Change and Proof Point. Within each of the five Gateways, there are a series of **quality benchmarks** that are key steps in developing and sustaining a partnership. Meeting the quality benchmarks in the Exploring, Emerging and Sustaining Gateways leads to System Change and ultimately Proof Point.

Partnerships implementing the Theory of Action effectively demonstrate four **principles** as they move from building a partnership to impacting outcomes:

1. Engage the Community

The work of the partnership must be grounded in the context of the community. Partnerships engage a broad array of community voices through building awareness and information sharing; involving and mobilizing the community towards improvement; and co-developing solutions and strategies with community members.

2. Focus on Eliminating Locally Defined Disparities

Inequalities in student achievement are defined by each partnership using local data and context. Partnerships make intentional efforts to eliminate disparities in achievement.

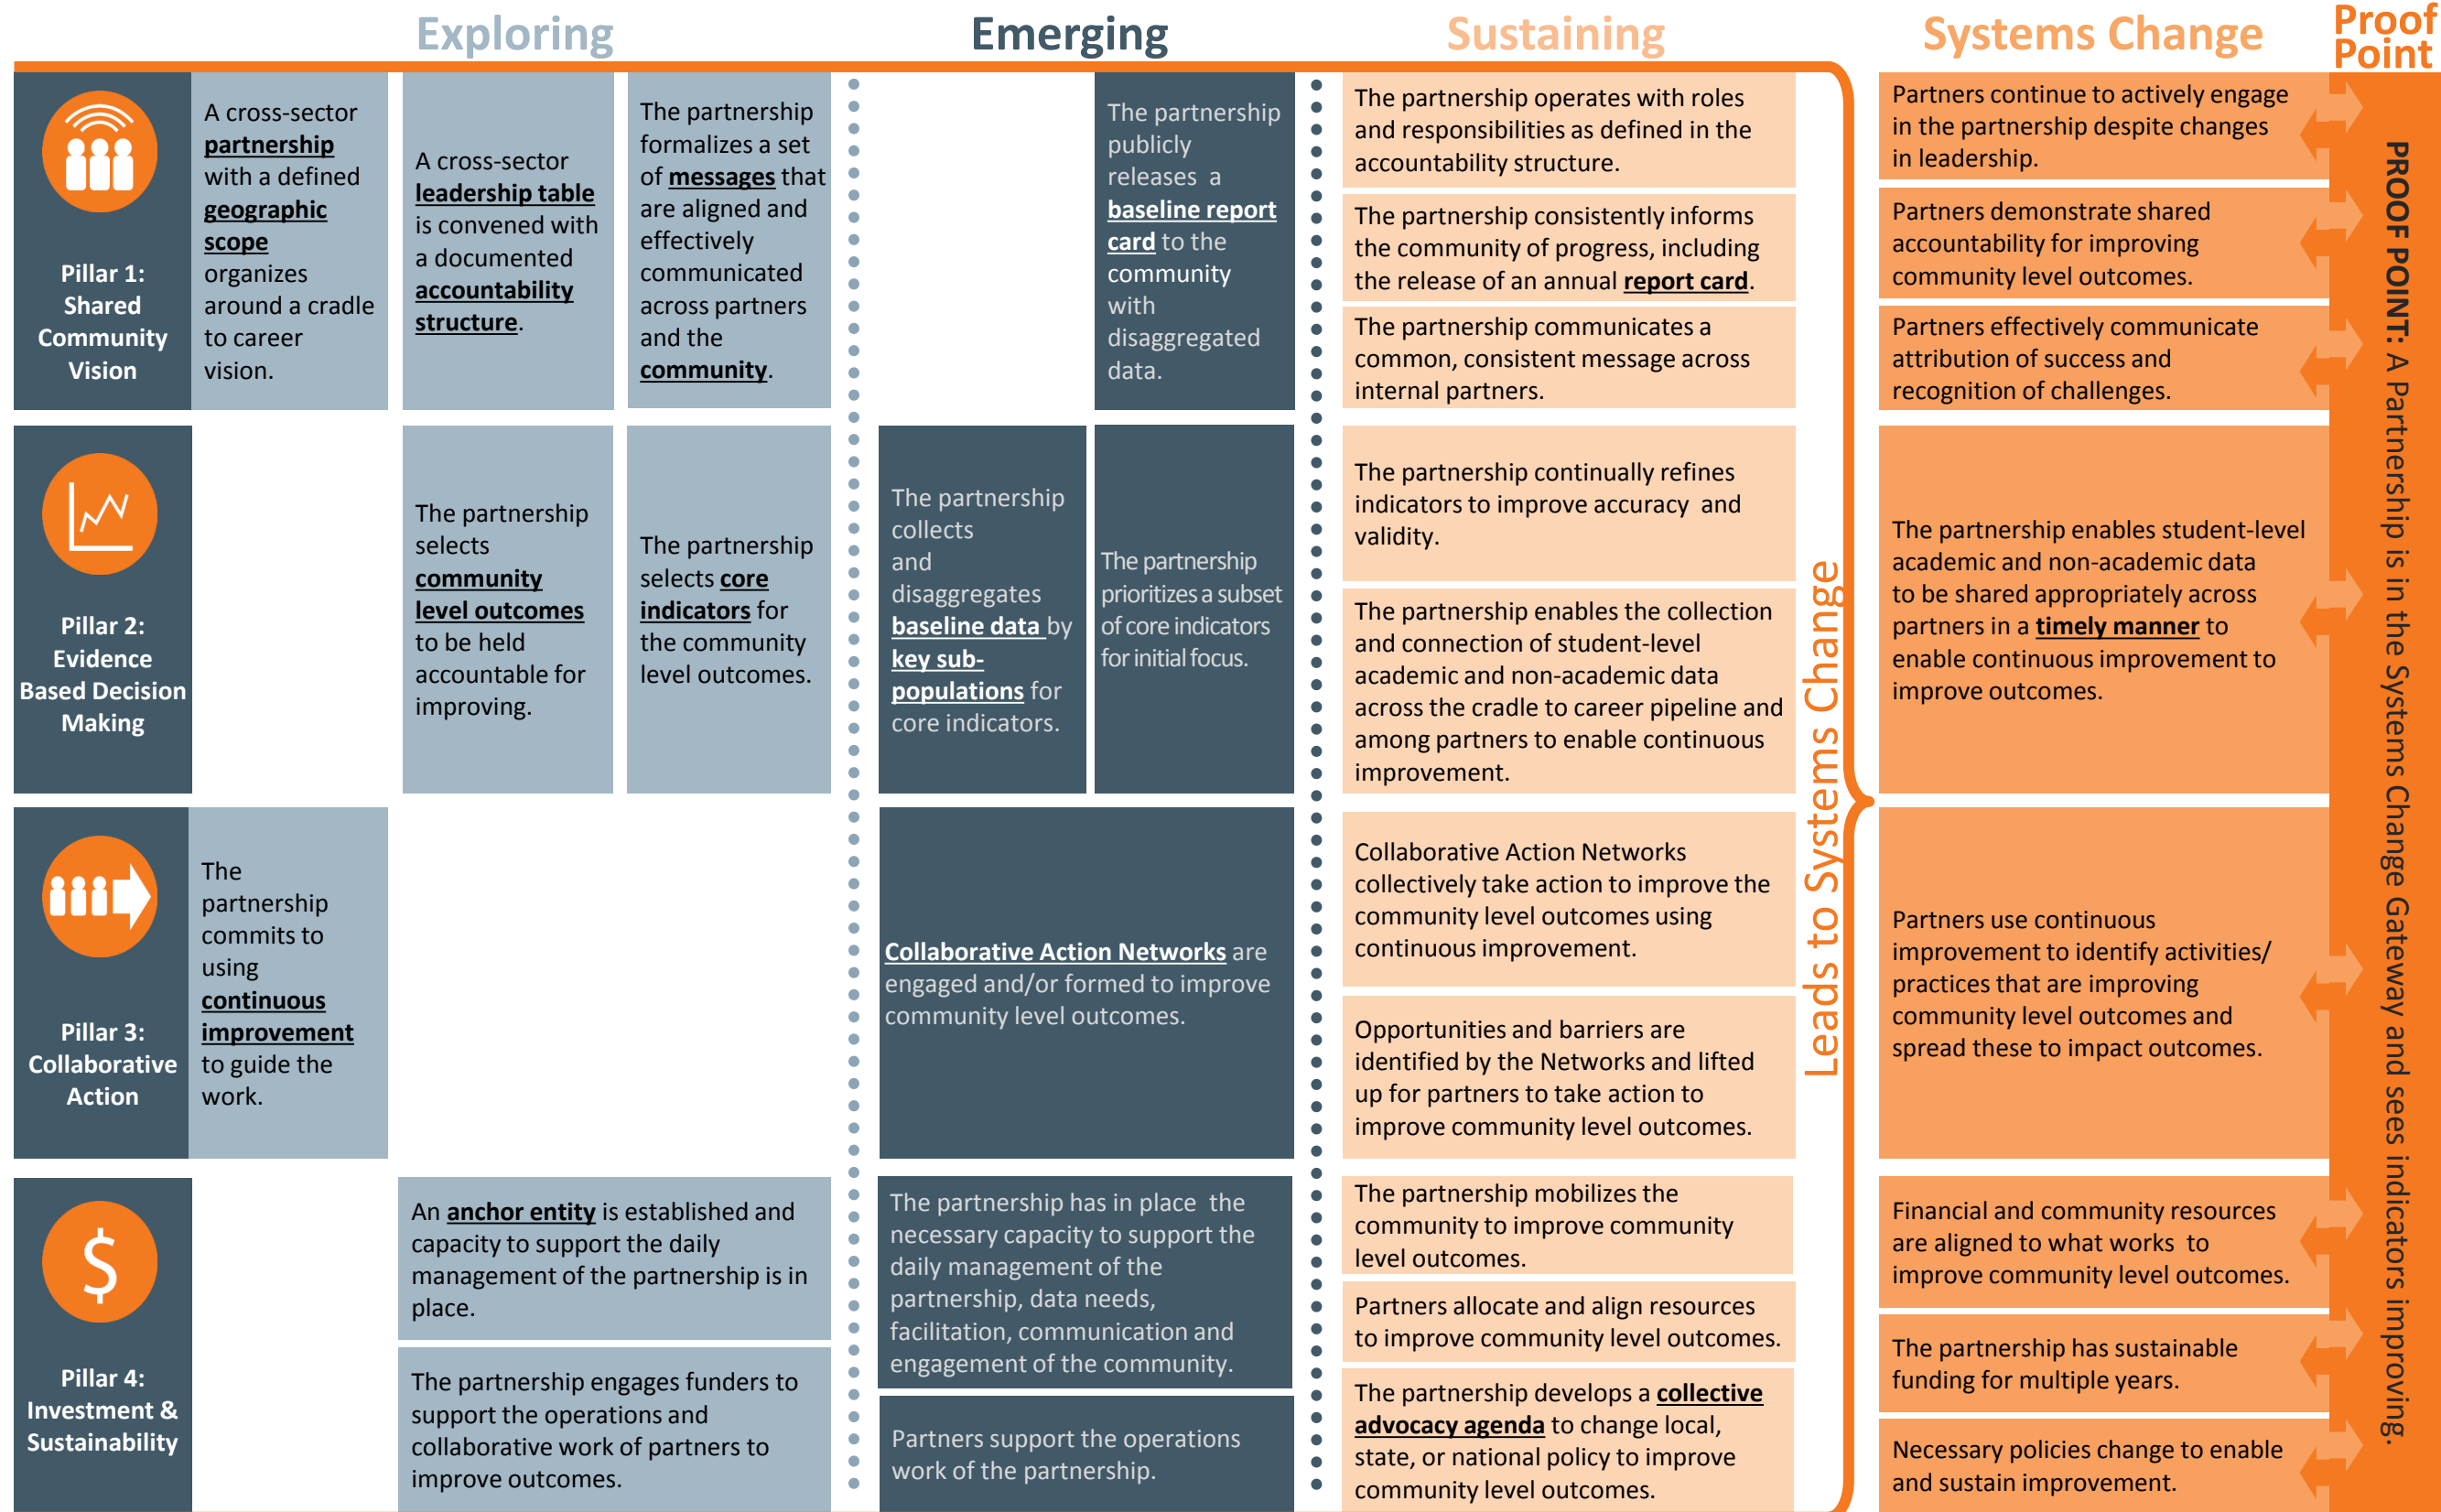

3. Develop a Culture of Continuous Improvement

The work of the partnership focuses on the use of local data, community expertise and national research to identify areas for improvement in a constant and disciplined manner that ensure Partners invest in practices that work.

4. Leverage Existing Assets

The partnership builds on existing resources in the community and aligns resources to maximize impact.
