

## **RHP 9 & 10 Collaborative Connections – Impacting Care A Learning Collaborative Summit**

**Breakout Session 3 - Day 2: Tuesday, February 10, 2016**

**TOPIC: Category 3 – Data Standardization**

**FACILITATORS:** Bonnie McCamey, PhD, Kyle Sechrist, and Charlene Randolph

This breakout session is focused on Category 3 – Data Standardization. This is an opportunity for providers to discuss data standardization across category three areas. A set of questions based on a variety of sources which include but are not limited to the responses from RHP 9 & 10 providers on the registration survey, RHP 10 Clinical Quality Committee and Needs Assessment Feedback, and ongoing RHP 9 provider feedback.

There are two types of questions for this topic:

- Data Collection and Management for Cat 3 at project level, regional level, & state level
- Project Evolution and Expansion

**Instructions:**

- **Read the questions on the back of this page.**
- **Select at least one question from data collection and management and one question from project evolution and expansion.**
- **Discuss and answer the question's selected.**
- **Make notes on the flipchart sheets regarding information for sharing with larger group.**

**Timing:**

- 5 min – logistics
- 20 minutes for discussion
- 35 minutes to present to team

## DISCUSSION QUESTIONS

### **Data Collection and Management**

1. How are you identifying your metrics?
2. What are key success factors to capturing and meeting your metrics?
3. How can you show for your projects value/ROI?
4. What have been your greatest challenges in capturing this data, how are you overcoming it?
5. What are your thoughts on how this could be measured at a regional or state level?
6. What would you find helpful to know from others on these metrics?

### **Project Evolution and Expansion**

- a. In the past, have you had any problems defining “denominator subsets” that accurately reflect your target population? How were you able to resolve those issues?
- b. A main focus of DSRIP is to improve processes and results. As you change your processes, how are you tracking the changes made and evaluating the impact of those changes? Have you made any changes that necessitated “correcting baselines”? Please explain.
- c. With the proposed “shared risk pool” measures being reported by HHSC, what impact do you think external standardized reporting will have on your ability to analyze the data, find opportunities for improvement, and evaluate process changes?
- d. Have you developed any best practices for archiving supporting data for metrics reported to HHSC for purposes of audits?
- e. Have you experienced any issues with staff understanding of the DSRIP measures and how changes in process could potentially impact them positively or negatively? How did you handle this? Did you provide any training/education around the use of data?
- f. With the proposed performance bonus pools, should we consider proactively creating a type of data sharing consortium to be able to calculate, monitor, and improve our measures?
