

DSRIP Reporting Coversheet

All providers should complete a coversheet, at the project level, for each Category 1 or 2 project being reported during the reporting period. This coversheet may include carryforward metrics as well as current DY metric achievement. Providers will use this template to clearly explain in where supporting information can be found and how supporting documentation submitted during this period demonstrates achievement of metrics. Providers do not need to submit a coversheet for Category 3 or Category 4 projects, but will need to complete the required templates for those Categories.
